

Parish Council Message

With reference to the item on speeding in this circular the term 'regular offenders' was used in error. The speed sign is not a camera and cannot identify individual vehicles only register the speed of them. During December over 38,000 vehicles were logged and the average speed of these was 20.67 mph.

For a number of years the parish council have asked for training for parishioners to monitor traffic through the village with hand held cameras. Also at the request of the parish council a police traffic survey was carried out a short time ago before lockdown began. The result of this was the conclusion from the police that there was not a speeding issue in the village. The Parish Council CANNOT prosecute anyone, only the police can do this if they observe speeding themselves or catch motorists breaking the official national speed limits on our roads.
